

BLUE CANYON

CABERNET SAUVIGNON

THE BLUE GRAND CANYON

Every living thing in Monterey County is directly influenced by the waters of the Monterey Bay. Hidden beneath the surface is an enormous submarine canyon, sixty miles long and two miles deep. Comparable in size and depth to its more visible counterpart in Arizona, this geologic wonder has been nicknamed the Blue Grand Canyon.

Situated less than 100 yards off the shoreline of the Monterey Bay, this deep canyon provides a climatic pathway connecting the ocean to all four wine growing regions that extend to the south down the Salinas Valley. At an estimated volume of 300 cubic miles of deep, cold water, the canyon's vast weather effect on these regions is manifested through fog, wind, and limited rainfall throughout the grape growing season.

ESTATE VINEYARDS

In our southern-most estate vineyards, the winds further affect the air temperature, causing dramatic day-to-night temperature variations. The warm days are ideal for ripening Cabernet Sauvignon grapes and other tannin-rich reds, while the cold nights ensure balanced acids and tannins.

TASTING NOTES

Blue Canyon wines are truly the "Soul of the Pacific Ocean." They deliciously express the nuances of each grape variety and the vineyards where the grapes are grown. Our wines are unique to this maritime-influenced region, the meeting point of land and sea.

Concentrated and rich aromas of blackberry and plum with hints of vanilla and mocha. Ripe black fruit flavors unfold in a long and savory finish, balanced with well-integrated tannins.
